(English version to be released at a later date)

The FineToday Group has established the materiality framework “Fine Today & Tomorrow,” which outlines key issues to be addressed by 2030 in pursuit of our purpose, to enrich the lives of everyone today and for generations to come, one fine day at a time. This framework is built on the four main areas of Prosperity, People, Planet, and Principles of Governance. Based on these areas, we have been advancing a wide range of sustainability initiatives in tandem with our business operations since our founding.

The report places “Aesthetic Intelligence,” a core value shared globally across the Company, at its foundation. Organized by materiality topic, it presents the CEO message, the progress of the materiality initiatives and related KPIs, a message from the General Manager, Human Resources Division introducing the concept of “Aesthetic Intelligence,” examples of how the business and materiality are integrated, and activity reports from employees.

The report was prepared with reference to international guidelines for explaining contributions to sustainability, including the Global Reporting Initiative (GRI), the Task Force on Climate-related Financial Disclosures (TCFD), and the Taskforce on Nature-related Financial Disclosures (TNFD).

Moving forward, we will continue to advance business operations and sustainability in tandem, placing our purpose at the core, and work to enhance corporate value by integrating financial and non-financial initiatives.
