

FineToday Group Sustainable Raw Materials Procurement Guidelines

To promote sustainable procurement as set forth in the FineToday Group Procurement Policy, we have established the Sustainable Raw-Materials Procurement Guidelines to promote sustainable procurement of palm oil-derived raw materials and paper, which exacerbate environmental and human rights issues in the countries of origin.

- Palm oil

We promote procurement of palm oil-derived raw materials related to products sold by FineToday in a manner that takes environmental protection in the country of origin and respect for human rights into consideration.

- Paper

We promote sustainable procurement of paper in a manner that takes into consideration the environment of the place of origin, resource circularity and other relevant matters.

- Conflict minerals

We promote the responsible procurement of minerals based on the scope of responsibility to which companies are required to adhere.
